

30 YEARS OF INTEL IN IRELAND - FAST FACTS

Our Leixlip campus is bigger than you think! The entire campus is 360 acres in size

There are almost 5,000 people working for Intel in Ireland

The technology that we manufacture in Leixlip is 14nm, that's 5000 times thinner than the width of a human hair!

Intel produces more than 300 quadrillion transistors each year – that's more than 10 billion transistors per second

In 2015 the Ireland Fab manufactured its 1 billionth microprocessor

There are Intel employees living in almost every single county in Ireland

1.1 million cups of coffee are served each year at the Intel campus

The air in our fab clean room is filtered to 1,000 times fewer airborne particles than would be found in a hospital operating theatre

In the last 5 years Intel Ireland employees have volunteered half a million hours

100% of all electricity supplied to Intel's Leixlip campus is generated from indigenous renewable sources

The Intel campus is home to a native Irish wildflower meadow of 2 acres in size
